18 to 24 in.	.50	.45	.42	.40	.37	.35

The Manchurian Apricot, Prunus Besseyi and Tomentosa have a dwarfing effect when used as root stock for peach and plum. The Mahaleb has some dwarfing effect as a root stock for Sweet Cherry.

We do not sell less than 10 of a kind and prices are for each variety. Less than 25 at the 10 rate, less than 50 at the 25 rate etc., except that 500 of a kind may be ordered at the 1000 rate.

Under 300 are sent prepaid. 300 or more are F.O.B. Marshalltown, Iowa.

Special Notice! - Please

Orders Must Total \$5.00 or More. We just cannot accept orders for a less amount.

On Angiers Quince		1.00	.75	.65	.55	.50

The Hardy Clark Dwarf apple grafts, if well planted, under normal growing conditions, will be ready to be budded to the desired fruiting varieties in August. Only the hardiest seedlings are used in making up these grafts. Thus, these are the hardiest of the known apple dwarfing stocks and should be used where hardiness is a factor. Our observations classify it as a semi-dwarfing stock, though the degree of dwarfing will vary with the variety, soil, climate and general cultural practices. Your trees grown on our hardy Clark dwarfing stock will not require support or staking.

The EM IX is the only true dwarfing stock now being recommended. It must be staked or supported when grown on the EM IX roots. Trees grown from grafts of the EM IX on our hardy seedling roots will not require support, and will be hardier. Both the hardy Clark and the EM IX grafts will have to be worked to the desired fruiting variety when ready after planting.

The MM series of apple root stocks are new and are Wooly Aphid resistant. These are classified as semi-dwarfing.

The Old Home pear is blight resistant and is used as a stock upon which to grow blight susceptible varieties. Since it is compatable with all pear varieties, it is desirable to use it on the quince dwarfing stock, then graft or bud the fruiting variety on the Old Home.

The EM II and VII have generally given the heaviest production.

Common varieties are those now being generally grown. Special varieties are the very new and the older varieties which are not being generally grown for which we have scion wood available. (See Special List).

PLEASE NOTE:

No orders for less than 3 of a kind can be accepted, nor for less than a total of \$5.00. Less than 300 will be sent prepaid. Over 300 are FOB, Marshalltown, Iowa.

If you may have scion wood available and desire grafts made up of varieties not listed, we will make them up for you at the same price as for common varieties on the particular root-stock desired. No such order can be made up however for less than \$5.00 regardless of the number of such grafts wanted.

We do guarantee all stock to be true to name and it will be delivered to the carrier in a live growing condition. We make no guarantee as to growth or production since planting, soil, weather and culture is beyond our control. All of our stock is State Inspected and guaranteed to be free of injurious insects or diseases.

Iowa customers must add 2 percent Sales Tax to their orders.

SPECIAL GRAFTS

To Be Grown In The Nursery For One Year

Per Each	3-10	11-24	25-49	50-99	100
APPLE, Standard trees,					
Comon Varieties	\$1.50	\$1.25	\$1.00	\$.80	\$.70

Special Varieties	2.50	2.25	1.95	1.75	1.65
Dwarf-on Angiers Quince	2.10	1.80	1.60	1.45	1.35

Minimum order 3 of a kind. Prices apply to each variety ordered. Sizes of trees will vary, especially with the variety and will run from 24 inches up, except the Hardy Clark Dwarf trees which will run from 12 inches up.

DUE TO THE HIGH COST OF HANDLING AND PROCESSING SUCH ORDERS, NO ORDER FOR LESS THAN \$10.00.

The Hardy Clark Dwarf and the EM IX will have to be budded to the desired fruiting variety by the buyer or by us on an extended contract. This is true also with the Old Home Pear on the Quince roots.

In making up the grafts for all standard apple, pear, Hardy Clark Dwarf and EM IX for stem-insert, only the hardiest apple and pear seedlings are used for the rootstock.

Orders for the one year trees must reach us by Feb. 15th and must be accompanied with a cash payment of one-half the total order. The balance to be paid prior to delivery. Orders for stock or scions which are not available when order is received, will be returned and the money refunded.

SPECIAL NOTICE - we do not propagate or grow on contract any patented variety of apple or pear, unless the buyer first makes proper arrangements with the patent holder.

We grow the following varieties for top-working: APPLE — Hibernial and Columbia Crab. PEAR — Old Home.

All of our stock is State inspected.

It is to be understood and agreed that, should any lot of trees being grown under the terms herein, be lost or destroyed in the field or packing house due to flood, hail, fire or other reason beyond our control, we shall be permitted to fulfill the agreement during the following season.
